

SW 1350/1600

Sit-on Stacker

Optimal driving experience

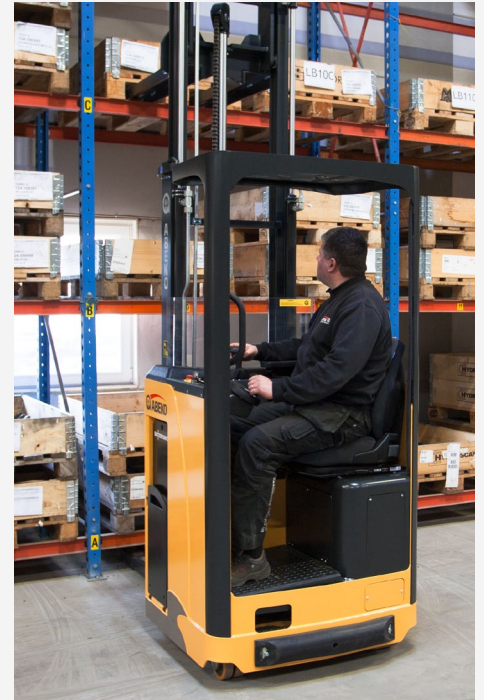

Here the driver experiences an optimum comfort thanks to all adjustment possibilities. The truck is available in a large variety of different designs. Initiallift, 2000kg capacity, four stage mast up to 7meters with extra low build-height are some examples. Driving with footpedals, joystick or electrically operated mini levers, regular or mini steering wheel in the armrest is optional.

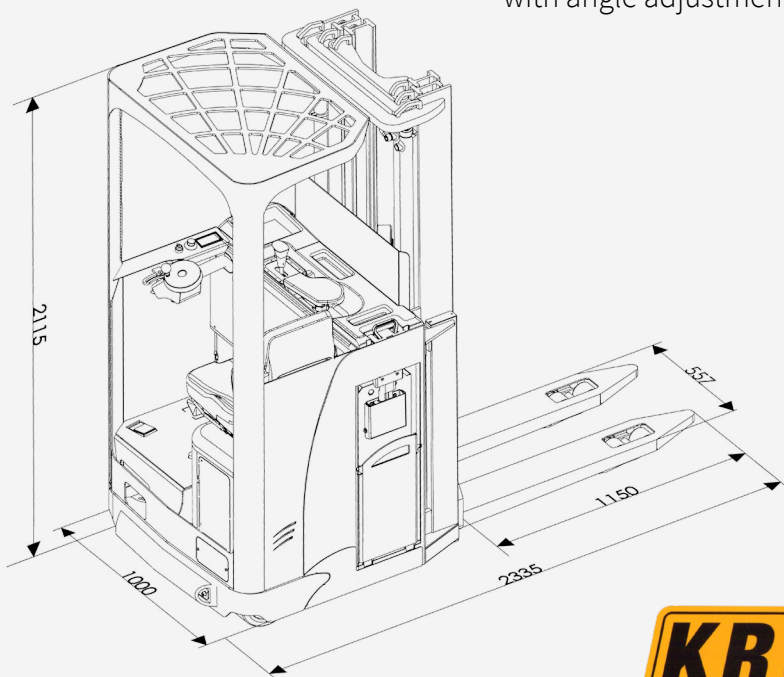

Step-in On SW 1350/1600 the step-in is only 230mm which helps the entry and exits from the forklift.

Adjustments The steering unit is fully adjustable. Further away, closer to the driver, changing angles etc. Stepless height controlled floor with angle adjustment.

Sight Very good sight from the driver's seat. Optimized view up through the mast and up through the driver protection roof.
